

Loads

S-Plug

Recommended loads¹⁾ for a single anchor.

The given loads are valid for wood screws with the specified diameter.

¹⁾ Required safety factors are considered. Valid for installation and use in dry base material for temperatures in the substrate up to +24 °C (resp. short term up to +40 °C).

²⁾ Valid for tensile load, shear load and oblique load under any angle.

³⁾ Due to that the failure of the substrate varies too much no reproducible values can be given.
